

# Project Aisle Tracker: Steps to Run

Team Name: CoolBeans

**The following are the sequence of steps required to run the Aisle Tracker Application:**

1. Unzip the Folder
2. Run the **main.java** file
3. The Login page will be displayed. To enter the Login Page using existing credentials, Enter the **USERNAME: sonali** and **PASSWORD: mondal**
4. To add a new user of the application, Click on Register New User. Register a new user and try to login
5. To check the various anomaly cases handled, try inputting a wrong password to see a prompt/dialogue box showing 'Incorrent password'
6. Once logged in, you enter the Product Display Page. Here, you can browse through the different categories available and add various products to the Cart. Items can be added using the '+' button and removed using the '-' button
7. Using the search bar, search for a substring of any kind to get a list of all products containing that substring. Try examples like - **milk, pasta, chocolate, etc**
8. Double Click the 'Search' button to get the results of the Search operation.
9. Try and add Items to the cart from the results of the search page as well
10. Navigate to the Cart by double clicking the Cart button
11. View the Aisle based Cart and see all the added products along with their prices
12. Navigate to the Checkout Button
13. Click on '**Generate Bill**' and get the total amount for the purchase
14. Click on the '**Checkout Button**' and Proceed to the '**Thank You**' Screen.
